### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John F. Hayden on October 5, 2007.

The application has been amended as follows:

20. A method according to claim +19, wherein the polymer film is a luminescent layer and the low molecular weight film is an electron transport layer or an electron injection layer.

21. A method according to claim +19, wherein the light emitting device is incorporated into an electronic device selected from the group consisting of a video camera, a digital camera, a goggle type display, a navigation system, a personal computer, a portable information terminal.

2. The following is an examiner's statement of reasons for allowance: the prior art of record does not reasonably teach or provide a motivation for hardening a top surface of the first insulating film by performing a first plasma treatment on the first insulating film after forming the first insulating film or hardening a top surface of the second insulating film by performing a second plasma treatment at least on the second insulating film after forming the second insulating film. Ura et al. (U.S. Patent No. 6,054,392) teaches a plasma treatment of an insulating layer to remove the damaged layer caused by etching, but does not explicitly teach that such a plasma treatment would harden the insulating layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
